DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Jairazhboy (5,685,475). Jairazbhoy et al. teach supplying a melt of solder such that the solder material adheres to a predetermined portion of the board in a solder material supply zone (Figure 1, Item 20); and cooling the board by a cooling unit in a cooling zone such that the solder material adhering to the board is rapidly cooled to solidify (Column 2, Lines 65-67 and Column 3, Lines 20-31); a cooling rate not less than 200 C/min (Column 2, Lines 65-67 and Column 3, Lines 20-31); cooling unit that uses gas cooling (Column 3, Lines 25-31); cooling with a gas having nitrogen (Column 3, Lines 25-31); cooling with a gas having nitrogen (Column 3, Lines 25-31) in which conditioning chamber the board is capable of conditioned such that the solder material adhering to the board in a completely molten condition is ensured at least before the rapid cooling of the solder material (Column 1, lines 15-32); wherein a temperature of an atmosphere in the conditioning chamber is capable of being in the range between a melting point of the solder material and a heat resistant temperature of the electronic component (col. 2, ll. 15-30).
